

Our 2024 Wealthpoint Pathways Conference in Blenheim kicked off with an outstanding line-up of speakers who had the packed theatre thinking, and talking, about important issues and opportunities for our members, advisers, and clients. This year's conference is also a celebration of Wealthpoint's fifth year in operation – so, very timely to consider what role technology such as AI will play in our industry (and our lives) in the future, as well as what the economic landscape might look like.

Our sincere thanks to Sir Bill English, KNZM, and Dr Masha McCauley for sharing your insights with us, to our fantastic MC - Joe Davis, and to all of our conference partners and suppliers – your support is greatly appreciated.
